CAB BOOKING PROJECT COST ESTIMATION AND DEMO LINKS PROPOSAL

Introduction

Cabo is a taxi ride hailing based system that provides services such as Transportation and Ride Sharing system. Cabo provides client with all the much needed service like transportation, booking different kinds of vehicles, booking parameters and booking details. our application supports multiple currency and multiple timezone, so you can launch this application world wide. And tagxi supports multilingual as well. you can also customise the localisation contents through translation option in our admin app.

Total in this project we develop

1. Cabo customer app
2. Both android and ios(for ios need more time)
3. Cabo driver app
4. Both android and ios(for ios need more time)
5. Admin panel
6. Disptacher panel
7. Landing
